it's been in the
family since 1963.

What kind of system does your property have?

Legacy Septic is dedicated to providing you with expert septic services.

Our organization is built on experience and knowledge and a commitment to your property. We invite you to share in our history and confidence and allow us to show you the available options.

Types of Septic Systems used in Carroll County

- Trench
- Deep trench
- Sand mound
- Inground Mound

Systems no longer Installed:

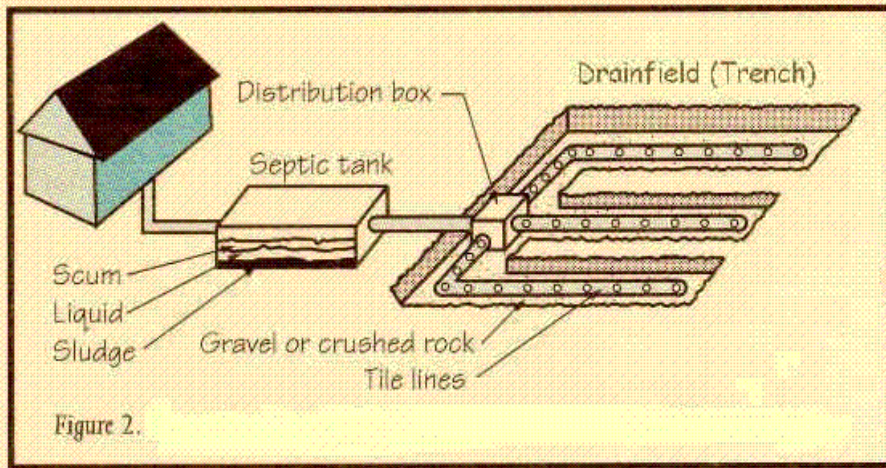

- Cess Pool
- Drywell / Seepage Pit

Bob Sisson, Licensed Home Inspector

"It is nice to meet another Septic Company that wants to do it right.... [I] See too many septic "inspectors" who use dye tablets and a mirror only and say "everything's fine..." Anyway, you all will go on our list of Good People for Up-county Septic companies.."

Inground Mound System

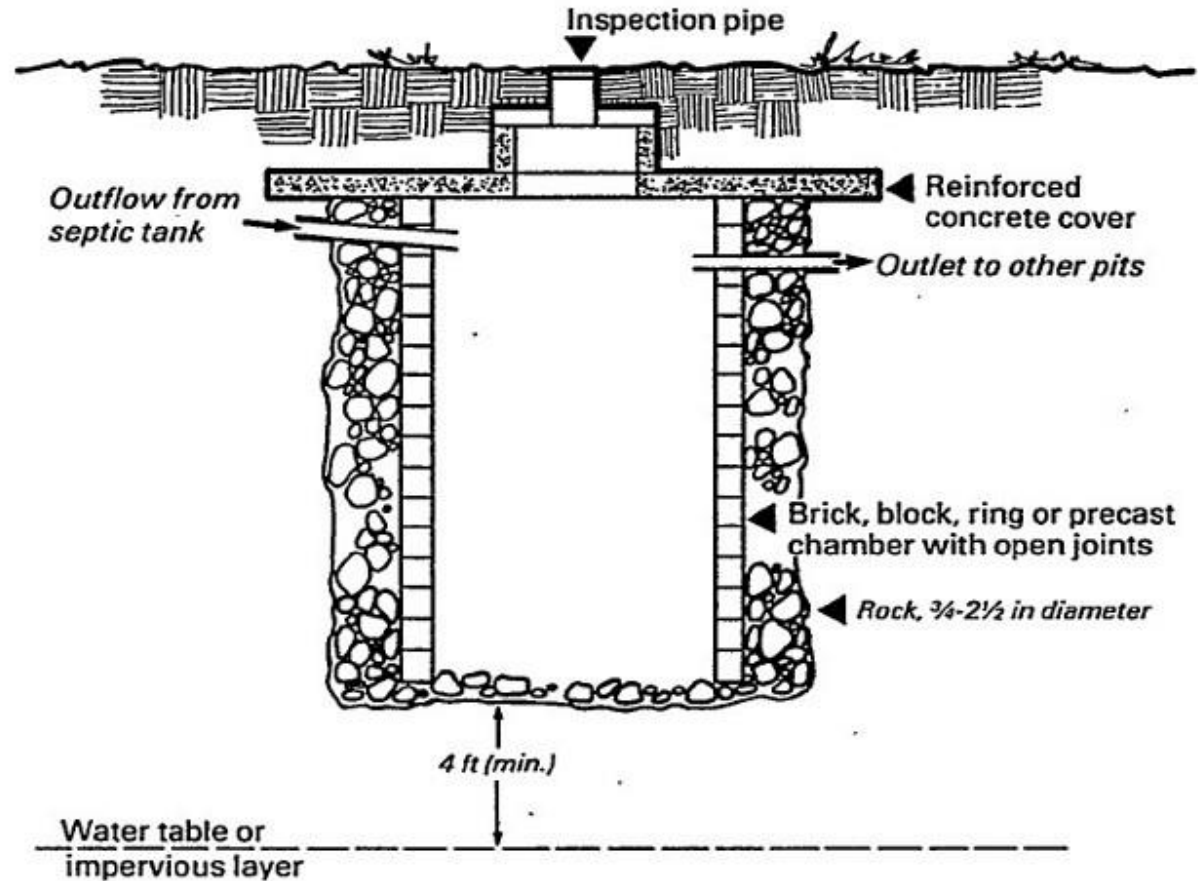

Installation of new septic tank

Types of Systems No Longer Being Installed

Seepage Pit

Risers!

BAT Systems

Norweco 1000 BAT System

Regarding the Bay Restoration Fund...
Times are Changing... Stay Tuned!

What NOT to do!

- Additives

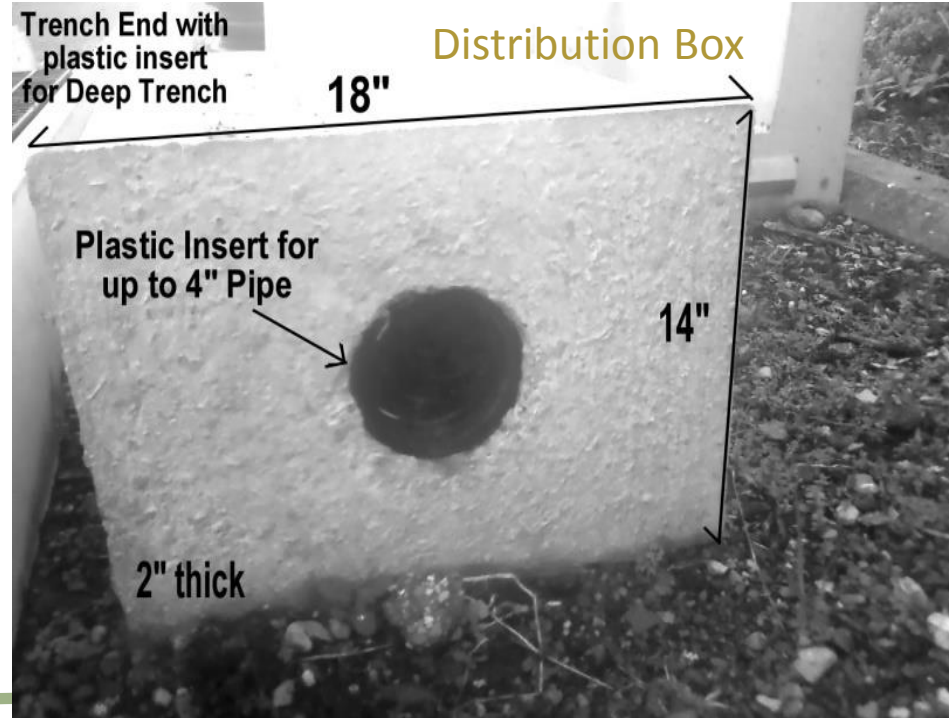

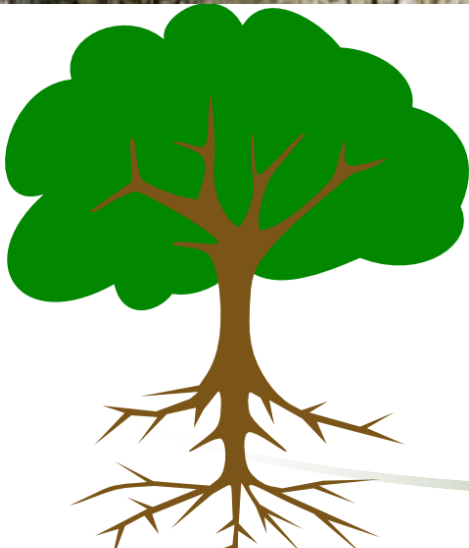

- Wipes – No wipes at all .. Sure, they're *flushable*...

- Garbage Disposals -

Keep the trees away from those septic systems! The problem with tree roots...

If you hear NOTHING else I say today...

- Septic Riser -

- Outlet Filter -

Amy, New Windsor, MD (Septic Inspection)

Thanks so much. George was great! My realtor was also impressed with how thorough and kind George was, so she may be throwing some work your way. [Originally] She suggested I use someone else, but I insisted I use you guys. ;)

Thanks again.
