

Upper Monocacy River Residential Planting

Erin Jacob Drive, Taneytown

This residential tree planting was completed in Fall 2023 in the Upper Monocacy River watershed, providing for a reduction of pollutant loads, stabilization, and improved habitat.

Initially, Resource Management staff met with interested landowners and determined the potential planting areas, native plant species, and the landowner's ultimate vision for his/her property. This particular planting resulted in the reforestation of **0.27 acres** of private property. A total of 80 trees were planted.
